***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 75 and 77, drawn to a smoking cessation kit.

Group II, claim(s) 76 and 78, drawn to method of making a smoking cessation kit.

Group III, claims 79-82, drawn to a method of treating nicotine addiction.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature shared by the above groups is providing cigarette having a nicotine level of 0.01% to .57%. However, the special technical feature does not contribute over the prior art (thus the inventions lack unity) because said special technical feature is already disclosed by Nestor et al (US 2005/0066986) providing a 630mg cigarette with .57 mg of nicotine using the FTC method which results in 0.09%. See Paragraphs 158-159.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
